

Fast, Furious and Fabulous Direct Posterior Composites Hands-On Program

Course Description
Half-Day Hands-On (2.5 – 3 Hours)

Jeff T. Blank, DMD, PA
Clinical Instructor for New Millennium Education, LLC
Adjunction Instructor, MUSC College of Dental Medicine
Private Practice, Fort Mill South Carolina

Description:

The frenetic pace of the typical esthetic dental practice demands direct posterior composite techniques and materials that permit high-end esthetics at a high speed pace. Whether placing a 3 shade, 2 opacity, internally tinted restoration, or a down-and-dirty 1 or 2 shaded composite, the objectives are the same: Get it done right, get it done fast, and control post-operative sensitivity.

The learning objectives of this fast moving, entertaining hands-on course are:

- Gain hands-on experience placing a single shade, fast and simple restoration, a 1-2 shade seamless restoration, and a 3 shade, polychromatic restoration with internal tints.
- Gain hands-on experience in creating consistent interproximal contacts using the Bitine Ring and AutoMatrix.
- Compare esthetic result and ease of placement of the various materials and techniques presented in this course.
