## **A Blueprint for Esthetics: The Art and Science of Exquisite Anterior and Posterior Indirect Ceramic Restorations**

### **Synopsis:**

In order to integrate indirect cosmetic dentistry into a busy general dental practice, clinicians must “begin with the end in mind” and create a Blueprint for Success. Foundational to exquisite esthetic dentistry is a mastery of basic adhesive principles. From this foundation, formational elements such as gingival esthetics, prep design, soft tissue management, impression taking, provisionalization, ceramic materials and final cementation are presented in a logical, easy to understand and execute format.
